7. The rejection of claims 8-14 and 19 under 35 U.S.C. 103(a) as being unpatentable over Homma in view of Walker, Journal of

Art Unit: 1713

Power Sources, vol. 110 pages 144-151 (2002) (hereinafter "Walker") is withdrawn.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

9. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

10. Claims 1-7, 9-14, 19-22 and 29-31 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Park et al., U.S.

Art Unit: 1713

Patent No. 6,271,278 (hereinafter "Park"). Park teaches a super-porous hydrogel composite comprising a mixture of ethylenically unsaturated monomers, a cross-linking agent and a disintegrant containing a second polymer. See Park, Abstract; col. 4, line 45 through col. 5, line 30; col. 6, lines 34-42; col. 12, lines 52-58. Park differs from the present invention in that the present invention expressly claims a first sulfonic and/or phosphonic and a second monomer while Park teaches, in general, a small list of monomers and mixtures including AMPS and HEMA.

11. The basic requirements of prima facie case of obvious are: (1) there must be some suggestion or motivation, either in the reference themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings; (2) there must be a reasonable expectation of success; (3) the prior art reference (or references when combined) must teach or suggest all the claim limitations. See MPEP 2143. "There are three possible sources for a motivation to combine references: the nature of the problem to be solved, the teachings of the prior art, and the knowledge of persons of ordinary skill in the art." See In re Rouffet, 149 F.3d 1350, 1357, 47 USPQ2d 1453, 1457-58 (Fed. Cir.

Art Unit: 1713

1998). Although Park does not disclose in the working examples a AMPS/HEMA monomer mixture, based on the specification as a whole a polymer chemist of ordinary skill in the art would be motivated to modify Park by preparing AMPS/HEMA copolymers. Such modification would be obvious because the working examples demonstrate the mixtures of AA/AM monomers, the advantages of hydrophilic/hydrophobic monomer mixtures and one would have a reasonable expectation of success that copolymers as taught by Park would be similarly useful and applicable to producing hydrogels. Therefore, claims 1-7, 9-14, 19-22, 29-31 and 34 are deemed as being unpatentable over Park.

12. Claims 15-18 and 32-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

13. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1713,

14. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
